

Hall Heating Demystified

Winter 2024 Update

We have a new set of mini-split heat pumps that keep the entire hall at a stable but cool temperature all the time. They are not controllable by renters.

If the hall is chilly, use the thermostat and timer by the double doors into the main room to turn on the oil furnace. You no longer need to open or close the floor vents, they can be left open at all times.

Hopefully this will be simpler for our renters and more efficient than our previous system.*

Warmly yours,

The Friends of the Montague Common Hall

* We are monitoring your feedback and the bills closely and may revise our approach if this proves not to be the case.
